Claims Allowed

Claims 1-9 are allowable over the prior art. The claims are allowable because the prior art does not anticipate nor render obvious the claimed invention of: a powertrain for a motor vehicle, comprising an internal combustion engine and an input shaft to a stagegeared gearbox connected to the engine crankshaft by way of a multi-disc clutch, the gearbox having at least one direct gear and at least one indirect gear with intermeshing toothed gears, a control element having at least one engine control function, the control element registering input signals representing the gear selected and various engine and vehicle data, which as a minimum cover the engine speed or revolutions of the input shaft or the vehicle speed, and the control element being configured, in response to an input signal indicating that a direct gear is engaged, to be capable of controlling the engine so that the engine can deliver a higher maximum permitted torque than when the direct gear is not engaged, the control element is further configured to allow the increase in the maximum permitted torque only if the efficiency of the gearbox with direct gear engaged and increased maximum permitted engine output torque is superior to the efficiency of the gearbox when any of the indirect gears having a lower maximum permitted engine output torque are engaged.

No particular single feature of the claim renders the claim as a whole patentable. Only the claim taken as a whole combination is deemed new and unobvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Prior Art Discussed

The examiner has considered the references cited by applicant in his Information Disclosure Statement filed concurrently with the application. None of the references show all of the features of the claimed invention, nor do they show that it would have been obvious to one of ordinary skill in this art at the time the invention was made to combine features therefrom to create the claimed invention.

The reference cited by the examiner is deemed pertinent to applicant's disclosure. None of the references show all of the features of the claimed invention, nor do they show that it would have been obvious to one of ordinary skill in this art at the time the invention was made to combine features therefrom to create the claimed invention.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dirk Wright whose telephone number is 571-272-7098. The examiner can normally be reached on Monday through Friday, 8AM-4:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Charles Marmor can be reached on 571-272-7095. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
